

Inaugurated in 2016, Sculpture Month Houston is a citywide event celebrating sculpture and installation art during the months of October and November. Every two years, the Sculpture Month Houston Festival is celebrated as a biennial event where selected art venues throughout the city of Houston and its environs are invited to participate and to present its creative energy and the many facets of sculptural and installation art.

Every time and period creates its own special image of the human figure that responds to its social and cultural mantras. Cubism, at the outset of Modernism, radically changed the figure by de-constructing, fragmenting, and subsequently re-constructing the human form. Why did it become the nearly ubiquitous icon of the modern human condition?

Artwork: Jimmy Canales; Midsection: Steve Parker; Cover: Kris Pierce
